

COMP Cams® Fabricated Small-Block Chevy Valve Covers

Modern Aesthetics, Modular Functionality

Olive Branch, MS — COMP Cams proudly announces the release of the new **Small-Block Chevy Fabricated Valve Covers**, engineered to deliver style, strength, and versatility for today's engine builders and enthusiasts. While traditional valve covers have long offered limited options, COMP Cams has developed a system that blends modern aesthetics with customization and advanced functionality.

At the core of this release is COMP Cams' Fabricated Valve Cover System, designed for flexibility and personalization. Unlike conventional valve covers restricted to fixed breather or fitting options, these new covers feature dual -16 ORB ports, allowing builders to configure their setup to match specific engine needs. The system is compatible with a wide range of -16 ORB fittings, PCV adapters, breather elements, and press-in breather adapters, allowing enthusiasts to tailor both function and appearance.

The debut offerings in this line are the Small-Block Chevy Fabricated Valve Covers, available in a range of finishes to suit any build. Each set combines a modern, fabricated design with proven durability and performance that COMP Cams is known for across the performance aftermarket.

Supporting this innovative system is a growing lineup of complementary components, including ORB plugs, AN fittings, multiple PCV adapter options, and breather elements. This comprehensive approach gives builders unprecedented freedom to configure their engine for maximum performance and a clean, customized appearance.

With the launch of the Small-Block Chevy Fabricated Valve Covers, COMP Cams continues to set the standard for performance parts, delivering unmatched quality, customization, and performance for enthusiasts who demand the best.
