

COMP Cams® LS/LT 1.900" Beehive Valve Springs

Olive Branch, MS — COMP Cams, the leader in valvetrain innovation, proudly announces the release of its new Street Performance RPM Series Beehive™ Valve Spring, engineered specifically for GM Gen IV LS7 and Gen V LT engines. Designed with cutting-edge technology and advanced materials, this 1.900-inch installed height spring delivers unparalleled durability, stability, and performance for today's street-driven high-performance builds.

Constructed using COMP's signature super-clean wire, each valve spring undergoes precision heat treatment to ensure accurate spring rates and improved strength. To further maximize service life, the springs receive a multi-peen process, polishing, and COMP's Ultra-Peen surface treatment, resulting in exceptional fatigue resistance and long-lasting reliability under extreme conditions.

The unique beehive profile of the spring provides a drop-in fit for LS7 and LT applications, reducing both spring and retainer weight for improved efficiency. Combined with the ovate wire design, which positions the maximum area of the wire at points of highest stress, the spring handles load more effectively while dissipating heat for longer service life. This design not only enhances efficiency but also supports a maximum valve lift of 0.650 inches within its optimized geometry.

Further distinguishing this spring is its ability to deliver outstanding stability at high RPM. The innovative shape and construction increase harmonic resistance, eliminating damaging vibrations and harmonics that can rob power and shorten component life. The result is increased torque and horsepower at higher engine speeds, while also enhancing overall durability for demanding performance applications.

Precision-engineered with dimensions of Top 0.650 in. / Bottom 0.906 in. ID and Top 1.034 in. / Bottom 1.290 in. OD, the new LS/LT 1.900" Beehive Valve Spring represents the next evolution in COMP Cams' dedication to performance and reliability. Whether for spirited street driving or high-performance builds, enthusiasts can count on COMP Cams to deliver the technology and quality demanded by modern GM platforms.

FOR IMMEDIATE RELEASE

Quick Facts

Product: COMP Cams® LS/LT 1.900" Beehive Valve Springs

Part Number: 26975-16

UPP Price: TBD

Social Media Pitch: COMP Cams® introduces its new Street Performance RPM Series 1.900" Beehive™ Valve Spring for GM Gen IV LS7 and Gen V LT engines. Engineered from super-clean wire, heat-treated, multi-peened, polished, and finished with COMP's Ultra-Peen process, these springs deliver maximum strength, durability, and reliability at up to 0.650" valve lift.

Features & Benefits:

- **Beehive™ Design** – Drop-In fit for LS7/LT applications, reduces spring and retainer weight.
- **Ovate Wire Design** – Maximizes strength at stress points and improves heat dissipation for longer life.
- **Enhanced Stability** – Resists damaging harmonics, increases high-RPM torque, horsepower, and durability.
