

FOR IMMEDIATE RELEASE

Edelbrock® Victor® Big-Block Chevy Valve Covers

Olive Branch, MS — Edelbrock proudly announces the launch of a bold new series of engine accessories designed, cast, and manufactured in the USA at Edelbrock's own foundry. While the iconic Edelbrock Classic series helped define an era, the engine accessories market has seen little innovation in recent years. That changes today, with a modern line that blends heritage, customization, and advanced functionality for today's enthusiasts.

At the core of this new series is Edelbrock's **Victor Valve Cover System**, engineered for flexibility and personalization. Unlike traditional valve covers locked into fixed breather or fitting options, these covers feature dual -16 ORB ports, allowing builders to tailor their setup to specific engine needs. The system is compatible with a wide range of -16 ORB fittings, Edelbrock's upcoming quick-release breather clamp, an in-development -16 ORB PCV valve, and adapter options for popular press-in breathers.

The debut products in this line are the **Big Block Chevrolet Valve Covers**, available in **Natural (EDL2004)**, **Chrome Plasma (EDL2005)**, and **Black Plasma (EDL2006)** finishes. Each set combines modern aesthetics with Edelbrock's legendary American-made quality.

Supporting this new modular design is a growing family of components, including breather elements, ORB plugs, AN fittings, PCV adapters in multiple configurations, and press-in breather adapters, which give builders unprecedented freedom to configure and customize their engine's appearance and performance.

"This new line is more than just an accessory; it's a philosophy of choice, flexibility, and forward-thinking design," said Greg Burgess, Product Development Manager at Edelbrock. "We're bridging our heritage of American manufacturing with modern innovation that empowers both longtime customers and the next generation of builders."

With this innovative system, Edelbrock is once again setting the standard—delivering style, strength, and customization for enthusiasts who demand the best.
