

Edelbrock® Performer RPM® Small-Block Oldsmobile Cylinder Heads

Olive Branch, MS — Edelbrock, a leading manufacturer of high-performance automotive aftermarket components, is excited to announce the release of its new **Performer RPM Cylinder Heads** designed specifically for Small-Block Oldsmobile engines. Engineered for enthusiasts seeking to elevate their Oldsmobile's power to the next level, these premium cylinder heads combine precision machining, high-quality components, and proven performance technology.

Manufactured in Edelbrock's ISO-certified facility in San Jacinto, California, each cylinder head is machined to exacting tolerances to ensure exceptional quality and consistency. Designed exclusively for Small-Block Oldsmobile applications, these heads feature a 68 cc combustion chamber, distinguishing them from their Big-Block counterparts. This chamber size is ideal for high-performance engines that do not require meeting emission standards, making them an excellent choice for both street and strip builds.

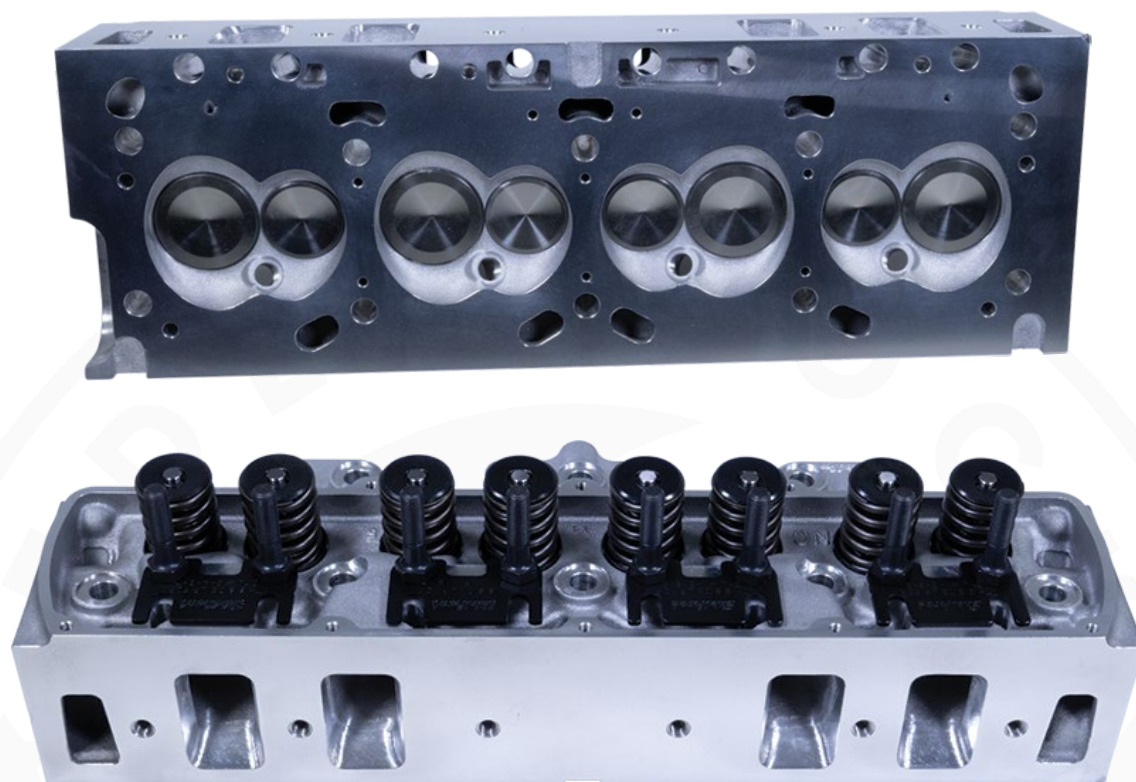

Every Performer RPM cylinder head is assembled with top-tier valvetrain components, including stainless steel one-piece swirl-polished intake and exhaust valves with undercut stems for increased flow, manganese bronze valve guides, ductile iron valve seats, positive oil control seals, hardened steel valve spring locators, and COMP Cams valve springs, retainers, and keepers.

Edelbrock's patented Clean-Cast Technology further enhances performance by eliminating internal casting flaws and creating a smoother surface finish, promoting improved airflow and coolant circulation. The result is more power and better cooling efficiency right out of the box.

The **Performer RPM Cylinder Heads** deliver exceptional value and performance for high-performance Small-Block Oldsmobile builds. For application-specific fitment, use Part #61035 for Hydraulic Roller applications and Part #61039 for Hydraulic Flat Tappet applications.

FOR IMMEDIATE RELEASE

Quick Facts

Product: Edelbrock® Performer RPM® Small-Block Oldsmobile Cylinder Heads

Part Number: 61035 (Roller), 61039 (Flat Tappet)

UPP Price: \$1246.95 (Roller), \$1305.95 (Flat Tappet)

Social Media Pitch: Edelbrock's new **Performer RPM Cylinder Heads** offer a premium performance upgrade for Small Block Oldsmobile engines. Featuring a 68 cc combustion chamber, precision machining in an ISO-certified facility, and high-quality valvetrain components, these heads deliver increased power and durability for street and strip applications.

Features & Benefits:

- **68 cc Chambers** – Optimized for Small Block performance
- **Mechanical Pump Clearance** – a machined pocket allows the use of a factory-style mechanical pump
- **Premium Components** – Stainless steel valves, bronze guides, ductile iron seats, COMP Cams springs
- **Clean Cast Technology** – Smoother surfaces for better airflow and cooling
