

FOR IMMEDIATE RELEASE

Edelbrock® Pontiac Victor Jr. Intake Manifold for Carb or EFI

Olive Branch, MS — Edelbrock releases the all-new **Pontiac Victor Jr. Intake Manifold**, engineered specifically for high-horsepower Pontiac applications where hood clearance is a concern.

The Pontiac Victor Jr. is designed with a low-profile carburetor height and angle that matches Edelbrock's popular RPM manifold (PN 7156), ensuring a familiar fit—ideal for enthusiasts running second-generation Trans Ams with shaker hoods. Despite its compact fit, this manifold is built for serious performance, with generously sized single-plane runners that can support engines up to 500 c.i. and power levels approaching 700 HP.

A standout feature of the new Pontiac Victor Jr. is that it is the first Edelbrock full-production manifold to utilize advanced 3D-printed intake core technology. This process eliminates the traditional “draft” in the casting, delivering perfectly sized and shaped runner exits right out of the box. The result is optimized airflow for maximum performance, eliminating the need for extensive port matching.

Key Features & Benefits:

- **3D-Printed Intake Cores** – Provide optimized runner shapes with no draft considerations for precise airflow and performance.
- **Low-Profile Fitment** – Maintains the same carb height and angle as Edelbrock RPM PN 7156, making it compatible with 2nd-Gen Trans Am shaker hoods.
- **Victor-Sized Runners** – Designed for large cubic inch and high-horsepower Pontiac builds, while maintaining the broad torque curve Pontiacs are known for.

Part Numbers & Applications:

- **PN 29569** – Carbureted Applications
- **PN 295695** – EFI Applications

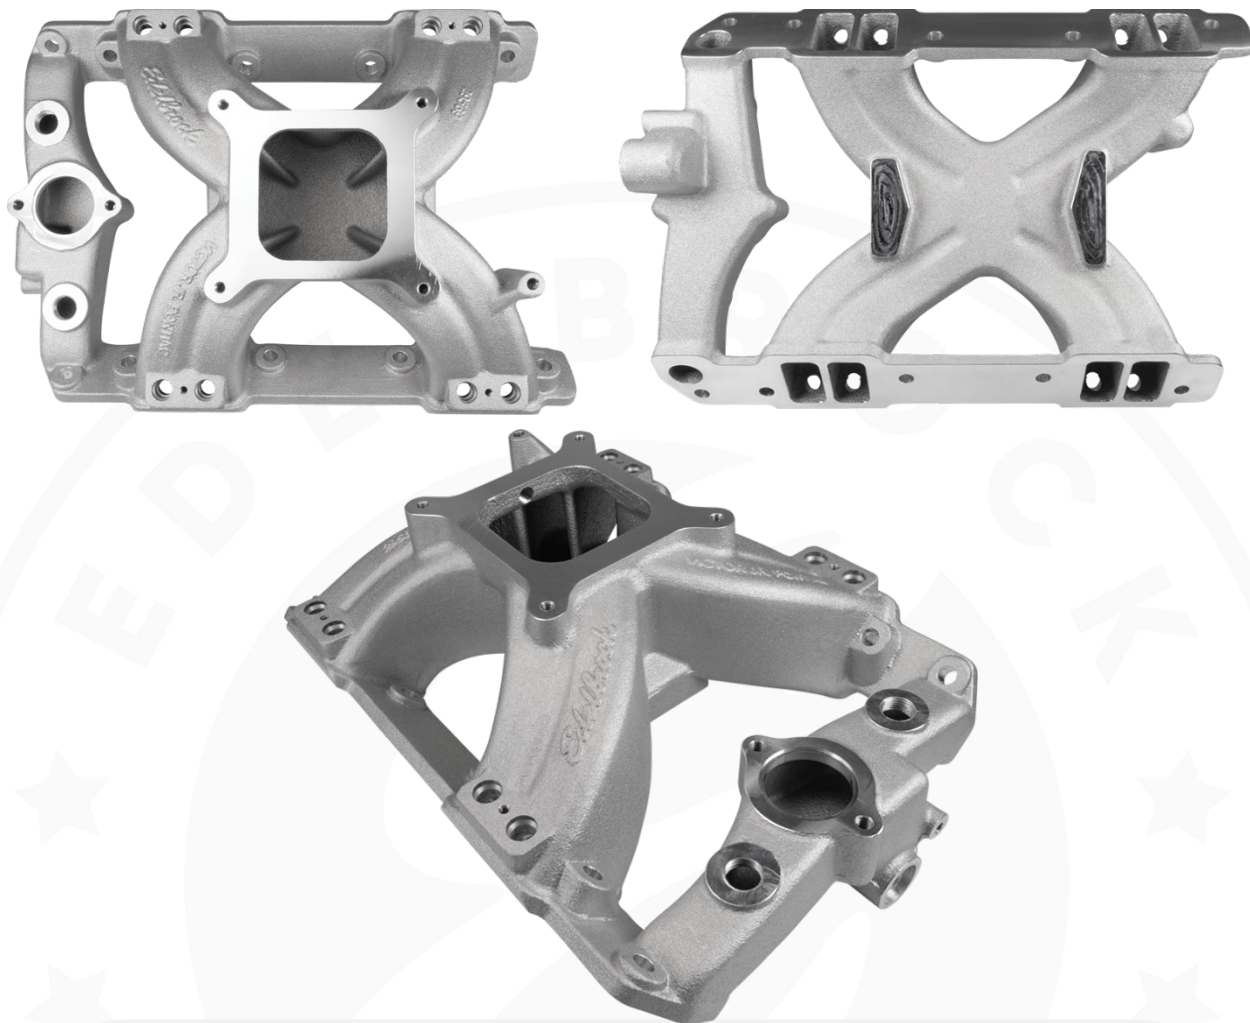

“The Pontiac Victor Jr. represents a major step forward for Edelbrock manifolds,” said Brent McCarthy, Product Development Manager at Edelbrock Group. “By leveraging 3D-printed core technology, we’re able to deliver unmatched precision and performance straight from the factory. Something Pontiac enthusiasts will appreciate on both the street and the track.”

FOR IMMEDIATE RELEASE

Quick Facts

Product: Edelbrock® Pontiac Victor Jr. Intake Manifold for Carb or EFI

Part Number: 29569 (Carbureted), 295695 (EFI)

UPP Price: TBD

Social Media Pitch: Edelbrock's all-new Pontiac Victor Jr. Intake Manifold delivers big performance in a low-profile design. Featuring 3D-printed intake cores for optimized runner shapes, it supports engines up to 500 c.i. and 800 HP while maintaining Pontiac's signature torque curve. Available for both carbureted (PN 29569) and EFI (PN 295695) applications.

Features & Benefits:

- 3D-Printed Intake Cores – optimized runner shapes with no draft considerations
- Low-Profile Fitment – same carb height and angle as Edelbrock RPM PN 7156
- Compatible with 2nd-Gen Trans Am shaker hoods
- Victor-Sized Runners – Designed for big-inch and high-horsepower Pontiac builds
- Maintains the broad torque curve of Pontiacs
