

FOR IMMEDIATE RELEASE

Edelbrock® VRS-4150® Calibration Kit

Olive Branch, MS – The VRS-4150 line of race and performance carburetors is the most versatile and feature-rich, out-of-the-box carburetor available on the market today. The **VRS-4150 Calibration Kit** provides enthusiasts, racers, and carb tuners with everything needed to fine-tune any VRS gas carburetor for optimal performance.

With over 130 precision-machined parts, this kit provides all the necessary components to ensure a finely tuned engine, offering optimal performance both on and off track. The key components included are:

- **4 of each even-numbered main fuel jets** ranging from size 62 to 78, giving users the ability to make global fuel curve changes.
- **2 of each 4-window power valves** with 5.5 Hg, 6.5 Hg, and 7.5 Hg ratings to adjust power enrichment points.
- **44 6-32 jets in sets of four** allow adjustments to the idle, intermediate, and power enrichment circuits on the metering blocks.
- **40 10-32 air bleed jets in sets of four**, allowing for quick and easy fine-tuning of the main, intermediate, and idle circuits from the top of the carburetor.
- **.033, .035, and .040 squirters**, to tune the duration of the acceleration pump shot.

All jets are manufactured in the USA using high-quality, precision-machined brass to ensure durability and accurate sizing. By providing the most commonly needed jets, bleeds, and power valves in one convenient package, Edelbrock gives customers the components they need to fine-tune their VRS Carburetors with ease and accuracy.

The **VRS-4150 Calibration Kit** is now available for purchase through the Edelbrock website, as well as authorized dealers and distributors. For more information, visit www.edelbrock.com.

FOR IMMEDIATE RELEASE

Quick Facts

Product: Edelbrock® VRS-4150® Calibration Kit

Part Number: 13201

UPP Price: \$259.95

Social Media Pitch: The VRS-4150 Calibration Kit, featuring over 130 precision-machined parts, provides all the necessary components to calibrate any 1306, 1307, 1308, or 1309 carburetor, adjusting it to be richer or leaner in all operating modes.

Features & Benefits:

- 36 – 1/4-28 main fuel jets for global changes
- 6 - four-window power valves for optimal cruise fueling
- 44 - 6-32 jets for idle, intermediate, and power enrichment fuel control
- 40 - 10-32 air bleeds for easy fine adjustments of all circuits
- 3 different squirters to tune the accel pump shot duration
