

FAST® Billet LS Gen IV Valley Cover

Olive Branch, MS — FAST proudly introduces the new **Billet LS Gen IV Valley Cover (146000-VCG4)**, designed to deliver strength, sealing, and precision for Gen IV LS engines. Built for performance and engineered for durability, this premium billet valley cover is compatible with all Gen IV LS applications, whether equipped with Displacement on Demand (DOD) or not.

Each AFM oil passage is sealed with high-grade O-ring gaskets, ensuring leak-free operation and consistent oil pressure in high-performance and high-demand environments. The kit comes complete with stainless-steel bolts and O-ring seals for DOD plugs, providing everything builders need for a secure and reliable installation. A sleek black anodized finish offers enhanced corrosion resistance and a professional appearance, while the integrated sensor port provision adds compatibility for both factory and aftermarket needs.

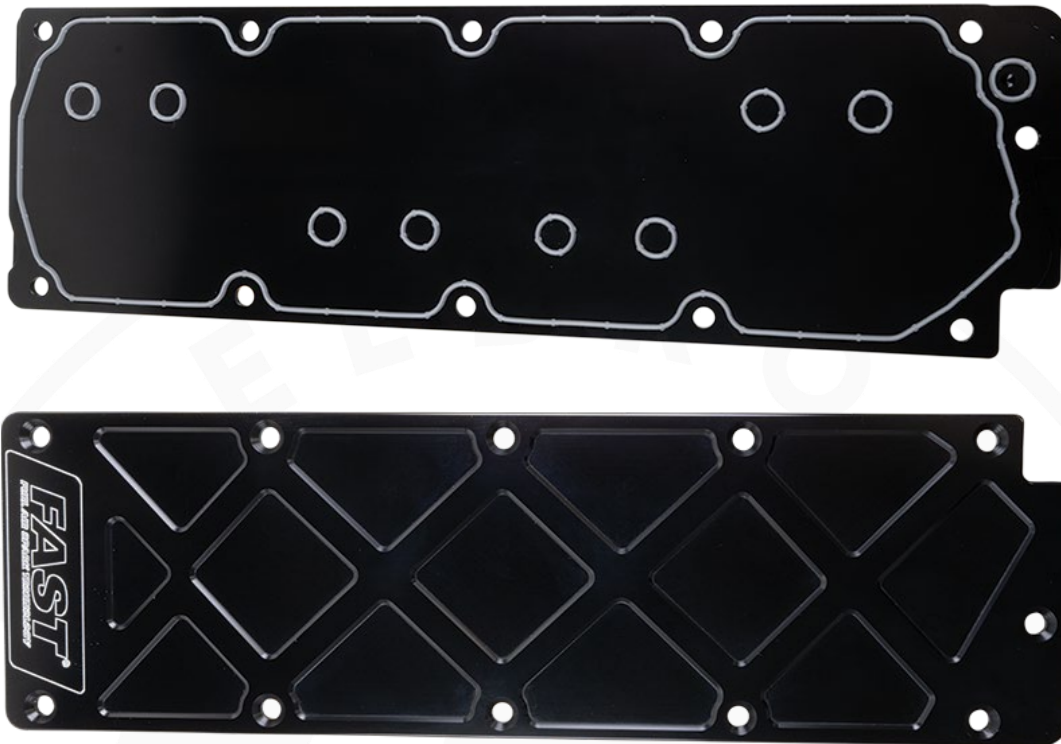

With the release of the FAST Billet LS Gen IV Valley Cover, enthusiasts and engine builders now have a high-quality solution that combines precision engineering with modern design. Whether on the street or on the track, FAST delivers components that maximize reliability and performance in today's LS engines.
