

TCI® 8HP70 Deep Aluminum Pan and Dipstick Kit

Olive Branch, MS — TCI Automotive introduces its all-new **8HP70 Deep Aluminum Pan & Dipstick Kit**, the first product of its kind to let consumers easily check transmission fluid levels and refill their transmission without the hassle of factory limitations.

Traditionally, servicing the ZF 8HP70 transmission is a complicated process that often requires a trip to the dealership or a high-end repair shop. TCI eliminates that frustration by incorporating a dipstick and fill tube directly into the transmission pan, making fluid checks, changes, and refills simple and straightforward for both enthusiasts and mechanics.

Beyond convenience, the deep aluminum pan offers several critical advantages. By increasing fluid capacity by one whole quart, the pan helps safeguard against fluid starvation during hard driving. Its cast-aluminum construction not only provides significantly greater durability compared to the factory plastic pan, but also dissipates heat more effectively, keeping the transmission operating at optimal temperatures. For added versatility, the pan includes a pre-drilled and tapped provision for a fluid temperature sensor and a drain plug for simplified future servicing. Each kit comes complete with the pan, gasket, filter, dipstick, and drain plug, and can also be paired with TCI #824105 Cooler Kit for additional functionality.

Designed to fit Dodge Challenger, Charger, Durango, and Ram 1500 models equipped with the ZF 8HP70 transmission, the TCI 8HP70 Deep Aluminum Pan & Dipstick Kit delivers unmatched performance, durability, and ease of use.

“The TCI 8HP70 Deep Aluminum Pan & Dipstick Kit gives consumers the freedom to service their own transmissions with ease,” said Scott Miller, General Manager at TCI. “We’re proud to be the first to market with a dipstick solution that combines added capacity, durability, and convenience for modern Mopar performance vehicles.”

FOR IMMEDIATE RELEASE

Quick Facts

Product: TCI® 8HP70 Deep Aluminum Pan and Dipstick Kit

Part Number: 129710

UPP Price: TBD

Social Media Pitch: The new TCI® 8HP70 Deep Aluminum Pan & Dipstick Kit makes servicing your transmission easier than ever. This first-to-market design allows you to check and refill fluid through an integrated dipstick, while the cast aluminum pan adds one extra quart of capacity, improved cooling, and greater durability compared to factory plastic. The complete kit includes a pan, gasket, filter, dipstick, and drain plug, plus provisions for a fluid temperature sensor. Perfect for Dodge Challenger, Charger, Durango, and Ram 1500 with 8HP70 transmissions.

Features & Benefits:

- Allows you to check your oil and refill with integrated dipstick
- Greater durability over factory plastic pan
- One extra quart capacity
- Provision for fluid temp sensor
