

TCI® GM 6L80E StreetFighter® Transmission Package

Olive Branch, MS — TCI is proud to announce the release of its new **6L80-E StreetFighter Transmission**, engineered for high-performance applications up to 750 horsepower. Designed to deliver the strength, consistency, and reliability demanded by serious street and performance builds, this new transmission incorporates premium components and precision engineering to handle elevated power levels with confidence.

At the core of the 6L80-E StreetFighter Transmission are high-performance clutches and steels specifically selected to withstand the stress of higher-horsepower applications. A new billet pump rotor assembly, paired with a precisely machined pump and updated sprag assemblies, provides more holding power — ensuring reliable performance under demanding conditions. Additionally, the transmission features new electronic components, providing improved control and responsiveness.

Every TCI 6L80-E StreetFighter Transmission is dyno-tested before leaving the factory to verify pressure and shift characteristics. Each unit ships with its individual dyno test results, providing builders and enthusiasts with assurance that their transmission has been thoroughly validated for both performance and durability.

The TCI 6L80-E StreetFighter Transmission offers a premium, turn-key solution for enthusiasts seeking to enhance the strength and capability of their drivetrain without compromising reliability or drivability.

FOR IMMEDIATE RELEASE

Quick Facts

Product: TCI® GM 6L80E StreetFighter® Transmission Package

Part Number: 391000

UPP Price: \$5667.00

Social Media Pitch: The new **TCI 6L80-E StreetFighter® Transmission** is engineered to handle up to 750 HP, making it the ideal choice for high-performance street and strip applications. Designed with premium internal components and advanced engineering, this transmission delivers strength, reliability, and precise shifting. Each unit is fully dyno-tested before shipping and includes detailed dyno results for added confidence.

Features & Benefits:

- **High-Performance Clutches & Steels** – Built for higher horsepower durability
- **Billet Pump Rotor & Machined Pump** – Upgraded sprag assemblies for more holding power
- **New Electronic Components** – Enhanced control and reliability
- **Dyno Tested** – Pressures and shift characteristics verified; dyno results included
